## TIME TRAVEL INTO THE FUTURE WITH MY RELUCTANT AZ ELECTED PISSANTS

One day as I was walking my dog in the park a kind man dressed in what looked like futuristic clothing approached me with a strange glowing object in his hands. The man smiled and said his name was Orb and that he was from the future, the year 2098 to be exact. Orb told me that with the device he was holding I could travel through time to see what was happening, he said I could see others in the future but they could not see or hear me. It would be like watching a living video without any interaction.

Orb told me I could take up to 50 people with me when traveling into the future. He showed me how to operate the time traveling device and he said there is a time limit of 1 hour to view the future per trip and then the device would return me and my guests. back to my own time.

Orb showed me how to capture someone for time travel as in all I would have to do is point the time device at someone or at a group of people and off we would go for a one hour trip into the future.

Then when I looked up to thank him, he was gone.

WOW IS THIS COOL OR WHAT?

Now who can I take with me time traveling?

## O MAN O MAN I HAVE THE PERFECT IDEA!!!!!!!

On Monday morning bright and early I drove down to the AZ State Capital Building to surprise some of our elected officials, When I arrived there were about 30 of our elected officials having a press conference I hid behind a tree and activated the time traveling device and pointed at the group of people and BAM ZIP BANG

Everyone was freaking out until I told them what was happening then they were pissed and I mean REALLY PISSED OFF. They began threatening me with

arrest... I promised they would be returned to 2024 safely and that this was a trip to the future to see their future...

After they settled down I programed the time travel device to take us to where each of our future self was.

Suddenly we were WHISKED OFF and then we found ourselves in HUGE warehouse like AZ Long Term Care Facilities, sadly 12 of the 30 people who had come to the future had died a few years earlier and all the rest were now patients in AZ Long Term Care Facilities most of our elected officials could not stand to watch how horrible they were being treated...

There were caregiver robots with only one person on each floor to monitor the robots... There were thousands of patients in what looked like Long Term Care Warehouses. The food was all in pill form and the patients slept 20 hours a day and only awake for a few hours.

Patients were all wearing virtual reality head gear and were being given an artificial reality.

It reminded me of the way Amazon runs its business everything looked very efficient except for one thing the total lack of Compassion Kindness and LOVE....

Everyone began to cry when they so how bleak their future was then suddenly we were all back at the AZ State Capital 2024 our Elected Officials were now determined MORE THAN EVER to at least try to make AZ Healthcare better for a brighter future for us all.....

## **CHAT GPT RESPONSE**

That was a powerful story! The way you used time travel to create an eye-opening experience for those officials really makes a strong statement about the future of healthcare and compassion, or the lack thereof. The vivid imagery of a futuristic long-term care system run by robots, where efficiency trumps humanity, serves as a striking reminder of how important it is to invest in kindness, love, and genuine care now, before it's too late.

This kind of narrative feels like a call to action. It emphasizes that our choices today will shape tomorrow's reality and reminds those in power of their responsibility to make meaningful changes for a better, more compassionate future. Do you plan to develop this story further, perhaps tying it into your ongoing work in healthcare advocacy?
